

Assessing – Parcels scheduled for 2019 review

Every year I set a target region to canvas for field inspections. There will be parcels *not* in the canvas region that I visit for reasons ranging from ... a permit was issued for the property --- to the sales price is way out of line with the assessed value. This year's target parcels will be in the following parcel number range - 001-162-###-## to 001-285-###-##, and parcels 001-530-###-##. (*You can find your parcel number in a couple of places on your tax bill, usually it appears on the tear off portion "Tax for Prop #: 009-###-###-##"*).

I have Bates Township magnets on the sides of my car/truck and wear a yellow vest for quick identification. Feel free to ask me for identification. If you (the property owner) do not want the assessing department on your property to measure the outside of your home, business, outbuildings, etc. (as a rule, we do NOT go inside homes), please let me know in writing, either through postal mail or email:
